***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 11, 27-32, and 37, drawn to methods of producing probes and identifying chromosomes, and to a kit for use therein.

Group II, claim(s) 33-36 and 38-40, drawn to collections of fluorophores and a method of use thereof.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the two groups represent a first method and product for use therein, and a second method and product for use therein. The first method relates to PCR amplification and detection via specific fluorophore-optical filter pair combinations, while the second method relates to general detection of biological molecules via collections of fluorophores. Thus the two groups do not share the same or corresponding special technical feature.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
